Staying Alive in Year Five

(Inspired by the novel written John Marsden, which we have been reading as a class novel.)

The year has got off to an interesting start. We are very lucky to have three Year Five classes and we extend a very big welcome to Mr Brown. We are so privileged to have someone with his experience and expertise working with us. In Maths the students have covered Whole Number and 3D Shapes and in HSIE, we are learning about Countries of the World. We were able to combine these themes by constructing 3D puzzles of major world landmarks. Weather has been the main focus of our Science Unit. Students have investigated the design and making of various weather instruments like the windmill and an anemometer, and will be given the opportunity to create a rain gauge. Therefore, we are off to a great start with lots happening in Year 5. Stay posted! Regards Year Five Students, Craig Brown, Ann Friedlieb, Loretta Zanotto & Maryanne Dodd.
