New Seating

Throughout the school holidays Derry has been working on a P&F and School project to build seats in the 600 block area. Derry has done a fantastic job and I encourage parents to go and have a look. This project was developed by the Student Leaders as a request from all students to replace the green seats. Through the P&F fund raising we were able to build three seats. The project is aiming to put seats around all the trees in the area. On behalf of the students, I wish to acknowledge my sincere gratitude to the brilliant P&F for their dedicate support and work they do around the school.
