Mathematic Marvels!

At the beginning of each Mathematics lesson, all children in 104 are involved in a Maths Rotation. These groups are of mixed ability and last for around 10-15 minutes each day. At the end of the week all children would have had access to interactive activities through the smartboard and the ipads, as well as having spent time with me in a small group revising a concept. There is an opportunity to think strategically with maths games too! After this rotation we get down to the serious business of learning something new.

How cool is that!
