Year 3 - 702 - News

Term 4 has begun!

We are very busy starting new topics.

In HSIE we are looking at how life has changed over the years. Perhaps you can tell your children how times have changed even since you were small! *(Or as they sometimes are heard to call them “The olden times”)*

In Science we are beginning a geology unit exploring soils, rocks and landscapes. Our photos show the children during Maths groups exploring Mass. Hands on activities with sand, water and lots of weighing!

We also started our new and exciting Dance program which will end with our concert in November.

Here’s to a great term!
