My time in 603

By Miss Brown

During my time in class 603, I have had the opportunity to observe and teach a number of interesting activities and topics, not only in the classroom, but on the Year 5 Bendigo and Ballarat excursion, which was a lot of fun. Some of the classroom activities I have had the privilege to teach include Year 5 Math groups where students have been exploring features of 2D shapes; looking specifically at regular and irregular shapes, triangles, angles, rotational symmetry and features of a circle. In English students are reading class novel A Banner Bold.

The Diary of Rosa Arons which gives a descriptive and personal insight into life on the Goldfields in 1854. 603 and other Year 5 classes are also constructing a PowerPoint recount of all the things they saw and did while on the Ballarat excursion. Fitting with this Gold unit, students are creating replicas of Colonial style weapons in Creative Arts that used by bushrangers and troops, in Australia during the 1850s. Although my time in 603 and at St Pat’s has only been a short stay I have sincerely enjoyed and, as a future teacher, have learnt so much. Good luck for the rest of Term 4, and thank you for welcoming me into your classroom and school; it has been an absolute honour and privilege to complete my final teaching practicum here with such amazing staff and students.
