Year three have hit the ground running.
We had our very first swimming carnival in Primary.
We have some champions already, Jess, Savannah, Dean, Seani, Tiannah, Mason, Josh and Hayden.
They went to the Deanery carnival on Friday.
Science is a fascinating topic about night and day. The children have already learnt about the rotational orbit of the moon and the earth around the sun! The children have been doing experiments that demonstrate this. They have also learnt why the sun and the moon look the same size in the sky. You might like to ask your child about this!
This semester we have a specialist teacher for PE, Miss Nancy Cirillo takes all year 3 separately on a Thursday and teaches them skills that they can apply to various sports throughout the year.
We have been to life Education van and have learnt a lot about cyber safety.
We also reacquainted ourselves with Harold and he is doing fine! He even gave us all a sticker and we gave him a pat.
We have also had the opportunity of learning about two codes of football.
Some representatives of the Canberra Raiders talked about bullying and how to deal with it.
The local AFL legends came and shared skill development lessons with us.
In Year Three this year we are doing lots collaborative lessons.
Each teacher in year Three has a turn to teach a different subject.
It is exciting and innovative and gets all children working together as a team.
